# MORE HYGIENIC

## SMART HEALTH PROTECTION: ROBUST SURFACES WITH ADDED VALUE.

Pfleiderer's wood-based materials are an excellent choice when it comes to providing additional hygiene protection in high traffic public areas. Duopal HPL can make an important contribution: it is low maintenance and easy to clean, has an inherently antimicrobial effect and can optionally be equipped with the unique antiviral microPLUS® surface finish – without quality compromises. It is perfect for ensuring that aesthetically appealing surfaces in offices and education facilities also offer a tangible added value.

# INTEGRATED HYGIENE: ANTIMICROBIAL AND ANTIVIRAL SURFACES.

Breaking infection chains can start with choosing the right wood-based material. In high traffic public areas where hygiene requirements are important, simply rely on wood-based panels that actively contribute to health protection to reduce the risk of people becoming infected by pathogens on surfaces. Pfliederer offers a multi-level protection concept for this purpose.

## ADVANTAGES

Antimicrobial surfaces reduce the risk of people becoming infected with pathogens via surfaces. This additional protection is an advantage, especially when there is a high frequency of visitors and high hygienic demands.

- Our standard HPL products and DecoBoard eliminate 99,9 % of all surface germs within 24 hours. This means that you can also use large parts of our range for sensitive areas – with all the usual advantages in terms of design freedom, processing and other material properties.
- The innovative microPLUS® surface, which is additionally available for selected products, provides even faster protection: It offers antimicrobial protection within 7 hours – and also acts as an antiviral surface against enveloped viruses within 24 hours!

# INDIVIDUAL DESIGN

## CREATIVITY WITHOUT COMPROMISE FOR UNIQUE LEARNING ENVIRONMENTS

Pfleiderer Individual is ideal for the consistent realisation of colour coded or other guidance systems or the visual differentiation of functional areas. The innovative digital printing process makes it possible to integrate customised decors directly onto the wood-based material which are suitable for interior design elements, furniture or doors. Your unique design can be created on a range of core materials, including high quality Duropal high-pressure laminate, starting from a production batch quantity of one. This makes it possible to design furniture and interior design elements in a way that precisely meets your tailored design, without compromise and to the highest quality.

## INSPIRINGLY CREATIVE WITH PFLEIDERER INDIVIDUAL.

Welcome to the unlimited design possibilities offered by Pfleiderer Individual. Use our innovative digital printing process to create your very own design exactly as you envision it to be – from interior design elements to furniture and doors. Pfleiderer Individual is available from a production batch quantity of one, and on a range of core materials varying from direct faced DecoBoard to high quality Duropal HPL. A range of suitable textures are available to additionally highlight the effect of your design.

## MAXIMUM DESIGN SCOPE FOR UNIQUE CONCEPTS.

Individual designs for customised one-off furniture and interior design elements – that is what Pfleiderer Individual stands for. State of the art digital printing technology means photos, illustrations, logos, lettering and all other kinds of reproducible templates can be created in the form of a high quality decorative panel, starting from a production batch size of one!

Pfleiderer Individual is available as HPL, on compact laminates, on HPL bonded boards consisting of a core material with a HPL coating on both sides and also directly onto the surface of DecoBoard.

Food-safe, easy to clean and robust surface, textures that perfectly match the overall look as well as a choice of core panels, from low emission to moisture-resistant and flame-retardant, are all still available alongside this digital printing technology. This allows you to benefit from the limitless creative freedom offered by Pfleiderer Individual, in particular for challenging areas of use such as healthcare centres, schools or cruise ship interiors!

# ATHIER LIVING ENVIRONMENT

## CREATE AN INHERENTLY SUSTAINABLE AMBIENCE.

Compared to other materials, wood inherently offers a range of advantages when it comes to healthy, sustainable building. Pfleiderer's wood-based materials make it possible to consistently make use of these advantages in interior design. Circular economy raw materials and certified low emission products meet the highest interior standards.

# DESIGNED FOR A FUTURE WORTH LIVING: SUSTAINABILITY AT PFLEIDERER.

## A healthy full range of products

Pfleiderer focuses on low-emission materials, e.g. F\*\*\*\* glued panels for interior design or LivingBoard with formaldehyde-free gluing. Many of our board materials have been awarded the Blue Angel for a healthy indoor climate for many years. At the beginning of 2020, we succeeded in obtaining this award – in addition to raw boards and directly coated products – also for large parts of the HPL range. This means that you can also fall back on a consistently sustainable full product range for demanding projects – and fulfil customer wishes without compromising on ecology and sustainability.

## Responsibility for tomorrow starts today

Those who rely on wood as a raw material rightly expect an environmentally conscious “green” material. We at Pfleiderer want to do full justice to this and have therefore been offering an extensive range of low-emission and environmentally friendly products for many years. Sustainability – in addition to ecological, social and economic aspects – as well as careful use of natural resources are permanent pillars of our corporate philosophy. Consistent recycling management and wood recycling ensure that no trees are felled for our products. Through regular independent evaluation of our procurement and production processes, we are able to ensure that we are able to offer our customers the best possible service, manufacturing and logistics processes as well as a corporate culture of accountability. We ensure that you can use our products with a clear conscience and recommend them to your customers.

Through multi-stage wood utilisation (so-called cascade utilisation), wood recycling, and the use of forestry wood and industrial waste wood for high quality materials with a long service life, Pfleiderer conserves valuable resources and actively contributes to reducing carbon emissions, air, water and soil pollution as well as the reduction of energy consumption. We control the wood mix individually, depending on the product, to achieve a perfect balance between quality requirements and resource conservation.

# MORE ADAPTABLE

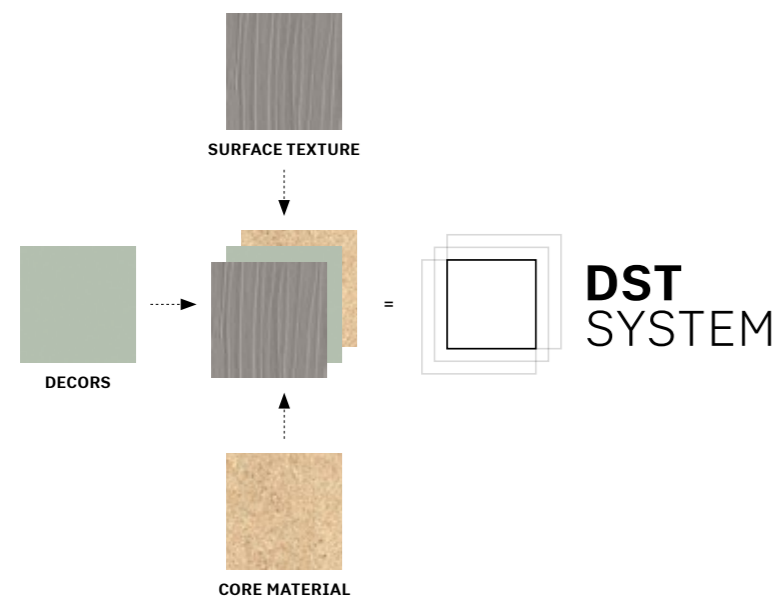

## FOCUS ON AESTHETICS: COMPLETE CHOICE FOR SOPHISTICATED DESIGNS.

People should feel comfortable in working and learning environments. A stylish design concept can considerably contribute to this emotion. It is an expression of appreciation, promoting well-being and helping people to identify with the respective company or institution. Pfleiderer offers a wide choice of stylish decors, functional surfaces and core materials that meet building requirements whilst still allowing sophisticated designs to be created across all trades and in outstanding quality.

# DESIGN AND FUNCTION IN HARMONY.

## Flexible choice of materials for individual solutions

Whether you want to use a certain colour across a range of items, have to fulfil specific fire prevention regulations or need a surface that is easy to clean, the DST system from Pfleiderer can help you to realise coherent and functional designs: it offers numerous, technically tested and visually checked combination options of decors, surface textures and core panels for you to choose from. In addition, all the decors from the design collection are available both as HPL and DecoBoard. Find exactly what you need to realise your vision. We are also happy to provide you with individual advice on request!

We also regularly conduct our own trend research and carry out trend analysis to ensure our decor choice is always up-to-date and fully meets the latest standards and requirements.

## FIRST IMPRESSIONS COUNT: CONCEPTS FOR CREATING INVITING SPACES.

You only have one shot at making a good first impression. Pfliederer offers compact panels with extremely robust surface finishes, antimicrobial properties and a solid dyed core which is perfect for reception counters, waiting rooms and office areas that need to be aesthetically pleasing for as long as possible. They are perfect high quality panel to be used in horizontal areas which are subject to heavy use. The entire DST system choice of decors and surface finishes is available for Duropal HPL Compact, whilst Duropal Compact XTreme plus combines a velvety matt feel with outstanding robustness and an anti-fingerprint effect.

### **Versatile choice for smart solutions**

As a decorative panel with a melamine coating on both sides, DecoBoard can be used for furniture and interior design element fronts as well as carcasses. The panels are low maintenance, low emission and available with the same decors and textures as Pfliederer's high-pressure laminates. Digitally printed customised designs for guidance systems, logos or graphic concepts can also be produced as a DecoBoard panel.

# AUDITORIUMS AND MEETING ROOMS

www.pfleiderer.com

## A SOLID BASE FOR BUILDING INSPIRATIONAL LEARNING SPACES.

Used often, and used by many people – to ensure the surfaces of desks and tables in auditoriums, classrooms or conference rooms look inviting and remain hygienic for as long as possible, they must be made with the appropriate materials. Pfleiderer's compact laminates are designed to permanently withstand the challenges of constant robust use and regular cleaning. They are available with a black, grey and white solid dyed core and create an aesthetic look which is perfect for designs featuring open edges.

### Simply integrate hygiene

All Duropal HPL, Duropal XTreme plus and DecoBoard surfaces are antimicrobial. This means that they actively suppress germs and bacteria\* that are left on the surface – and thereby automatically contribute to reducing the infection risk in learning environments without any limits in terms of the design options.

# LIBRARIES

© Jens Kirchner, Düsseldorf

## COMPLETELY FOCUSED: ON LOAD-BEARING INTERIOR DESIGN ELEMENTS.

Whether a classic collection of books, a digital archive system or a refuge for focused working – the library plays a key role in the everyday lives of education facilities. Room concepts for libraries must take storage and presentation systems into account, as well as study spaces for the users. Pfleiderer's wood-based materials offer precisely the right properties for this: from extremely durable high-pressure laminate as a surface finish on horizontal areas to low emission chipboard panels with a decorative facing.

# STUDENT ACCOMMODATION

© Brigida González

## CLEVER INTERIOR DESIGN WITH POTENTIAL FOR GROWTH.

Affordable accommodation is always scarce in university towns. For many students, halls of residence with furnished rooms are therefore a great alternative to the accommodation available on the open market.

### Entire room concepts from one source

Designing areas with enough space to live, eat, sleep, study and preferably with some storage space on a small footprint, can be a real challenge. Pfleiderer's wood-based materials unlock a range of attractive options for ensuring that furniture and interior design elements can meet these requirements. With robust HPL for surfaces that are subject to heavy use and panels with a decorative facing in a matching decor for furniture and interior design elements that create a healthy living environment, ideas can be realised in a stylish and affordable way – if required, even cross-trade with the incredibly robust, supermatt XTreme surface finishes.

D-s2,d0 according to EN 13986 dependent on end use (Thickness:  $\geq 9$  mm / Gross density:  $\geq 600$  kg/m<sup>3</sup>)

### Formaldehyde emission class

E1 E05  
CARB Phase 2 / TSCA Title VI

### Note

The lacquering can be applied on one or both sides.  
With 1-sided lacquering, the reverse is raw / untreated.  
XTreme Matt (XT) / XTreme High Gloss (XG)  
Due to the use of a natural wood-based material, the appearance of the panel can vary.  
Such deviations are due to the desired character of the product. As is usual with natural products, each board is unique.  
FSC certification or PEFC certification available on request.
